**Hate Crime** By Nathan Hall

Since the publication of the first edition of 'Hate Crime' in 2005, interest in this subject as a scholarly and political domain has grown considerably both in Britain and North America, but significantly also in many other parts of the world. As such, this second edition fully revises and updates the content of the first, but within a broader international context.

Building on the success of the first edition, this accessible, cross-disciplinary text also includes a wider range of international issues, and addresses new and emerging areas of concern within the field. The book will be of particular interest to academics, undergraduate and postgraduate students, criminal justice practitioners, and policy-makers working within the area of hate crime and related fields of crime, social justice, and diversity. It will also be of value to others who may hold a more general interest in what is undoubtedly a rapidly evolving and increasingly important area of contemporary and global social concern.
