## Statistics: Informed Decisions Using Data Pearson New International Edition By Michael Sullivan

Mike Sullivan regularly teaches introductory statistics, and this experience has helped him develop a understanding of what today's students need to succeed in the course. Statistics: Informed Decisions Using Data, Fourth Edition, provides tools that help students see the bigger picture and make informed decisions. In addition, Mike's contributions to the supplements and technology program make it easier to teach a multi-dimensional, engaging course. Developed for this new edition, a Student Activity Workbook with accompanying instructor notes helps instructors integrate activities into their course. Also, the text offers new features that take advantage of statistical software, so students can focus on building conceptual understanding rather than memorizing formulas. A new example structure offers a bridge between by-hand solutions and the use of technology, and updated technology support appears in each chapter. All the resources—including the author's Camtasia Studio® videos that respond to student questions and his national survey data in StatCrunch—were created for Mike's classroom and are available for use in yours, to help students succeed and stay engaged.
