Lees' Loss Prevention in the Process Industries: Hazard Identification, Assessment and Control (3 Volumes), 4th Edition By Frank Lees

Safety in the process industries is critical for those who work with chemicals and hazardous substances or processes. The field of loss prevention is, and continues to be, of supreme importance to countless companies, municipalities and governments around the world, and *Lees'* is a detailed reference to defending against hazards. Recognized as the standard work for chemical and process engineering safety professionals, it provides the most complete collection of information on the theory, practice, design elements, equipment, regulations and laws covering the field of process safety. An entire library of alternative books (and cross-referencing systems) would be needed to replace or improve upon it, but everything of importance to safety professionals, engineers and managers can be found in this all-encompassing three volume reference instead.

- The process safety encyclopedia, trusted worldwide for over 30 years
- Now available in print and online, to aid searchability and portability
- Over 3,600 print pages cover the full scope of process safety and loss prevention, compiling theory, practice, standards, legislation, case studies and lessons learned in one resource as opposed to multiple sources

Editorial Review

Review

"...this is still the most comprehensive treatise on process safety and loss prevention available... it should be in the process safety department library of any company involved with manufacturing handling, and processing hazardous chemicals. Also, process safety/loss prevention specialists and consultants will find it an invaluable source book on practically every subject in this field." - CCPS Journal

About the Author

M. Sam Mannan, PhD, PE, CSP, is a chemical engineering professor and director of the Mary Kay O'Connor Process Safety Center at Texas A&M University. He is an internationally recognized expert on process safety and risk assessment. His research interests include hazard assessment and risk analysis, flammable and toxic gas cloud dispersion modeling, inherently safer design, reactive chemicals and run-away reactions, aerosols, and abnormal situation management.

Users Review

From reader reviews:

Bonita Murray:

Have you spare time for any day? What do you do when you have considerably more or little spare time? Yep, you can choose the suitable activity regarding spend your time. Any person spent their spare time to take a stroll, shopping, or went to the actual Mall. How about open or perhaps read a book titled Lees' Loss Prevention in the Process Industries: Hazard Identification, Assessment and Control (3 Volumes), 4th Edition? Maybe it is for being best activity for you. You already know beside you can spend your time with your favorite's book, you can smarter than before. Do you agree with it has the opinion or you have various other opinion?

Daniele Chambers:

Now a day individuals who Living in the era just where everything reachable by interact with the internet and the resources within it can be true or not need people to be aware of each information they get. How a lot more to be smart in getting any information nowadays? Of course the solution is reading a book. Examining a book can help folks out of this uncertainty Information mainly this Lees' Loss Prevention in the Process Industries: Hazard Identification, Assessment and Control (3 Volumes), 4th Edition book because book offers you rich facts and knowledge. Of course the details in this book hundred per cent guarantees there is no doubt in it as you know.

Christopher Jorge:

This book untitled Lees' Loss Prevention in the Process Industries: Hazard Identification, Assessment and Control (3 Volumes), 4th Edition to be one of several books which best seller in this year, that's because

when you read this e-book you can get a lot of benefit onto it. You will easily to buy that book in the book shop or you can order it by using online. The publisher on this book sells the e-book too. It makes you more easily to read this book, since you can read this book in your Smartphone. So there is no reason for you to past this publication from your list.

John Silver:
