The Master Book of Mathematical Recreations (Dover Recreational Math)

By Fred Schuh

Praised for its "exceptionally good value" by the *Journal of Recreational Mathematics*, this book offers fun-filled insights into many fields of mathematics. The brainteasers include original puzzles as well as new approaches to classic conundrums. A vast assortment of challenges features domino puzzles, the game of noughts and crosses, games of encirclement, sliding movement puzzles, subtraction games, puzzles in mechanics, games with piles of matches, a road puzzle with concentric circles, "Catch the Giant," and much more. Detailed solutions show several methods by which a particular problem may be answered, why one method is preferable, and where the others fail. With numerous worked examples, the clear, step-by-step analyses cover how the problem should be approached, including hints and enumeration of possibilities and determination of probabilities, application of the theory of probability, and evaluation of contingencies and mean values. Readers are certain to improve their puzzle-solving strategies as well as their mathematical skills.

Text: English, Dutch (translation)

About the Author

Dutch mathematician Frederik Schuh (1875–1966) received his PhD in algebraic geometry from Amsterdam University and taught at the Delft University of Technology.

Users Review

From reader reviews:

Michelle Wilson:

As people who live in often the modest era should be revise about what going on or facts even knowledge to make these keep up with the era which is always change and move forward. Some of you maybe will probably update themselves by reading through books. It is a good choice for you personally but the problems coming to an individual is you don't know what type you should start with. This The Master Book of Mathematical Recreations (Dover Recreational Math) is our recommendation to help you keep up with the world. Why, since this book serves what you want and need in this era.

Patricia Dennis:

Reading a book to be new life style in this calendar year; every people loves to read a book. When you read a book you can get a wide range of benefit. When you read publications, you can improve your knowledge, because book has a lot of information on it. The information that you will get depend on what types of book that you have read. If you would like get information about your examine, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, this kind of us novel, comics, and soon. The The Master Book of Mathematical Recreations (Dover Recreational Math) will give you new experience in examining a book.

Curt Stewart:

As a university student exactly feel bored for you to reading. If their teacher expected them to go to the library in order to make summary for some book, they are complained. Just minor students that has reading's soul or real their pastime. They just do what the trainer want, like asked to the library. They go to there but nothing reading very seriously. Any students feel that looking at is not important, boring as well as can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore this The Master Book of Mathematical Recreations (Dover Recreational Math) can make you really feel more interested to read.

Gary Campbell:

What is your hobby? Have you heard that question when you got pupils? We believe that that question was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. And also you know that little person just like reading or as reading become their hobby. You have to know that reading is very important along with book as to be the matter. Book is important thing to add you knowledge, except your own teacher or lecturer. You will find good news or update regarding something by book. Numerous books that can you choose to use be your object. One of them is The Master Book of Mathematical Recreations (Dover Recreational Math).
