**Governance of Europe's City Regions: Planning, Policy & Politics** By Tassilo Herrschel, Peter Newman

*Governance of Europe's City Regions* considers the changing role of the European Union in regional issues, explores how national governments have become increasingly involved at the regional scale and examines the constitutional and political contexts in which regional and local governments operate. Detailed case studies of regions in Germany and England illustrate contrasts in European approaches to the scale of government, and the complex interactions of international, national, regional and local scales of policy intervention. The book offers a unique perspective, which links together an analysis of both regional Europe and the local economic and political factors that shape successful regions.
