Multi-Objective Programming and Goal Programming: Theory and Applications (Advances in Intelligent and Soft Computing) From Springer

This volume constitutes the proceedings of the Fifth International Conference on Multi-Objective Programming and Goal Programming: Theory & Applications (MOPGP'02) held in Nara, Japan on June 4-7, 2002. Eighty-two people from 16 countries attended the conference and 78 papers (including 9 plenary talks) were presented. MOPGP is an international conference within which researchers and practitioners can meet and learn from each other about the recent development in multi-objective programming and goal programming. The participants are from different disciplines such as Optimization, Operations Research, Mathematical Programming and Multi-Criteria Decision Aid, whose common interest is in multi-objective analysis. The first MOPGP Conference was held at Portsmouth, United Kingdom, in 1994. The subsequent conferences were held at Torremolinos, Spain in 1996, at Quebec City, Canada in 1998, and at Katowice, Poland in 2000. The fifth conference was held at Nara, which was the capital of Japan for more than seventy years in the eighth century. During this Nara period the basis of Japanese society, or culture established itself. Nara is a beautiful place and has a number of historic monuments in the World Heritage List. The members of the International Committee of MOPGP'02 were Dylan Jones, Pekka Korhonen, Carlos Romero, Ralph Steuer and Mehrdad Tamiz.

Editorial Review

From the Back Cover

This volume constitutes the proceedings of the Fifth International Conference on Multi-Objective Programming and Goal programming held in Nara Japan 2002. The book is dedicated to multi-objective methods in decision making. One half of the book is devoted to theoretical aspects, covering a broad range of multi-objective methods such as multiple linear programming, fuzzy goal programming, data envelopment analysis, game theory, and dynamic programming. Readers interested in practical applications, will find in the remaining parts a variety of approaches applied in numerous fields including production planning, logistics, marketing, and finance.

Users Review

From reader reviews:

Annie Boyd:

Book is definitely written, printed, or descriptive for everything. You can understand everything you want by a book. Book has a different type. As you may know that book is important thing to bring us around the world. Close to that you can your reading talent was fluently. A publication Multi-Objective Programming and Goal Programming: Theory and Applications (Advances in Intelligent and Soft Computing) will make you to possibly be smarter. You can feel more confidence if you can know about every little thing. But some of you think that open or reading a book make you bored. It is far from make you fun. Why they may be thought like that? Have you looking for best book or ideal book with you?

Christine Frazier:

What do you about book? It is not important along? Or just adding material if you want something to explain what you problem? How about your free time? Or are you busy man or woman? If you don't have spare time to complete others business, it is give you a sense of feeling bored faster. And you have extra time? What did you do? Everybody has many questions above. They need to answer that question since just their can do this. It said that about reserve. Book is familiar in each person. Yes, it is suitable. Because start from on pre-school until university need this specific Multi-Objective Programming and Goal Programming: Theory and Applications (Advances in Intelligent and Soft Computing) to read.

Michael Davis:

Do you considered one of people who can't read satisfying if the sentence chained from the straightway, hold on guys this particular aren't like that. This Multi-Objective Programming and Goal Programming: Theory and Applications (Advances in Intelligent and Soft Computing) book is readable by simply you who hate those straight word style. You will find the info here are arrange for enjoyable studying experience without

leaving actually decrease the knowledge that want to offer to you. The writer connected with Multi-Objective Programming and Goal Programming: Theory and Applications (Advances in Intelligent and Soft Computing) content conveys objective easily to understand by many individuals. The printed and e-book are not different in the articles but it just different by means of it. So , do you nevertheless thinking Multi-Objective Programming and Goal Programming: Theory and Applications (Advances in Intelligent and Soft Computing) is not loveable to be your top collection reading book?

Antonio Ritchie:

Beside this Multi-Objective Programming and Goal Programming: Theory and Applications (Advances in Intelligent and Soft Computing) in your phone, it might give you a way to get closer to the new knowledge or info. The information and the knowledge you are going to got here is fresh from oven so don't possibly be worry if you feel like an older people live in narrow town. It is good thing to have Multi-Objective Programming and Goal Programming: Theory and Applications (Advances in Intelligent and Soft Computing) because this book offers for you readable information. Do you often have book but you do not get what it's exactly about. Oh come on, that wil happen if you have this with your hand. The Enjoyable blend here cannot be questionable, similar to treasuring beautiful island. Techniques you still want to miss that? Find this book in addition to read it from right now!
