Cardio-Renal Clinical Challenges From Springer

???????In modern medicine, the aging population is prone to many simultaneous cardiovascular (CV) risk factors which often produce co-incident pathology. Nowhere is this more obvious than in the interaction between Chronic Kidney Disease (CKD), Diabetes and diverse CV diseases (CVD). This is a complex and challenging area, as the presence of CKD/diabetes promotes CVD while also complicating its treatment. The emergence of CKD as a public health priority is one of the most challenging problems of modern medicine. It is now solidly established that renal dysfunction portends a high risk for cardiovascular disease. Cardiovascular diseases remains the main cause of death in western societies and the amplification of the death risk conveyed by coexisting CKD, even though still poorly understood, appears considerable. The bidirectional link that associates renal and cardiovascular diseases, the high risk of the death signalled by their coexistence and the considerable epidemiological burden imposed by this link is at the basis of the emergence of a new discipline aiming at making the borders between nephrology and cardiovascular medicine even more permeable than before. The term Cardio-Renal Syndrome was coined around 5 years ago to try to formalize this link, and act as a stimulus to interaction between clinical teams, researchers and others to achieve better management and outcomes for all.

This book takes clinical presentations and clinical problems as its base, and then discuss the evidence for best management of common clinical problems as well as the reasons for the complex interplay between the cardiac and renal systems. Moreover, it addresses the issue of organizing healthcare to maximize the opportunities for prevention and best healthcare economic returns, building on cutting edge initiatives at the Karolinska, Stockholm.

The book will be of immediate value and interest to all cardiologists and renal physicians.

Editorial Review

Users Review

From reader reviews:

Donald Taylor:

Information is provisions for folks to get better life, information today can get by anyone from everywhere. The information can be a know-how or any news even a concern. What people must be consider whenever those information which is within the former life are challenging to be find than now is taking seriously which one works to believe or which one the particular resource are convinced. If you obtain the unstable resource then you have it as your main information we will see huge disadvantage for you. All those possibilities will not happen throughout you if you take Cardio-Renal Clinical Challenges as the daily resource information.

Dawn Spigner:

People live in this new day of lifestyle always aim to and must have the spare time or they will get large amount of stress from both lifestyle and work. So , when we ask do people have extra time, we will say absolutely sure. People is human not really a robot. Then we consult again, what kind of activity have you got when the spare time coming to anyone of course your answer will probably unlimited right. Then do you try this one, reading books. It can be your alternative inside spending your spare time, typically the book you have read is usually Cardio-Renal Clinical Challenges.

Deana Smith:

Your reading 6th sense will not betray anyone, why because this Cardio-Renal Clinical Challenges reserve written by well-known writer who really knows well how to make book which can be understand by anyone who all read the book. Written within good manner for you, dripping every ideas and composing skill only for eliminate your hunger then you still skepticism Cardio-Renal Clinical Challenges as good book not simply by the cover but also from the content. This is one book that can break don't ascertain book by its protect, so do you still needing an additional sixth sense to pick this!? Oh come on your examining sixth sense already said so why you have to listening to another sixth sense.

Jonathan Ownby:

Many people spending their period by playing outside along with friends, fun activity with family or just watching TV 24 hours a day. You can have new activity to invest your whole day by reading a book. Ugh, do you consider reading a book can definitely hard because you have to use the book everywhere? It all right you can have the e-book, bringing everywhere you want in your Smartphone. Like Cardio-Renal Clinical Challenges which is keeping the e-book version. So , try out this book? Let's view.
