Medical Entomology for Students By Mike Service

Arthropod vectors of human infections, such as malaria, filariasis, West Nile virus, Lyme disease and typhus, are a continuing threat to human health. Medical Entomology for Students provides basic information on the recognition, biology, ecology, and medical importance of the arthropods that affect human health. The fourth edition of this popular textbook is completely updated, and now incorporates the latest strategies for controlling insects, ticks and mites. Extensive illustrations, with new colour photographs of some of the most important vectors and pests, will assist readers in recognizing arthropods such as mosquitoes, flies, and myiasis causing larvae. With a clear presentation and concise style, this text is specifically aimed at students of medical entomology, tropical medicine, parasitology, and pest control. It will also be essential reading for physicians, nurses, health officials, and community health workers

Editorial Review

Review

From reviews of the third edition: '... a very well written book that is well suited for its purpose as an introduction for students ... it would serve well as a quick refresher to the subject even for experienced medical entomologists.' *The Lancet*

From reviews of the third edition: '... undergraduate and postgraduate masters students can continue to rely on this affordable and reliable basic introduction to the discipline of Medical Entomology.' *Parasitology*

From reviews of the third edition: 'This is an easy to understand introduction to the field of medical entomology for more readers than just students of biology and entomology ... [another] appropriate title might be Medical Entomology for Health Care Providers and Public Health Practitioners.' *Doody's Review Service*

'Striking new features of the book include a colourful front cover bearing a female Anopheles farauti looking replete following lunch and a central block of 24 colour plates depicting a range of vectors of medical importance. ... a 'must have' for those studying the discipline and a continuing strength is its frequent updating cycle and the helpful addition and revision of the further reading section.' Richard D. Ward, School of Life Sciences, Keele University

About the Author

Mike Service is a world authority on medical entomology, with fifty years' experience of research and teaching. He is Emeritus Professor of Medical Entomology at the Liverpool School of Tropical Medicine, and has written over 200 research papers on medical entomology. In 1997 he was awarded the Sir Rickard Christophers medal by the Royal Society of Tropical Medicine and Hygiene, and in 2002 the Harry Hoogstraal Medal by the American Society of Tropical Medicine and Parasitology, for research on medical vectors.

Users Review

From reader reviews:

Michael Greene:

What do you about book? It is not important along with you? Or just adding material when you require something to explain what yours problem? How about your extra time? Or are you busy man? If you don't have spare time to accomplish others business, it is gives you the sense of being bored faster. And you have free time? What did you do? All people has many questions above. They must answer that question simply because just their can do that will. It said that about guide. Book is familiar in each person. Yes, it is right. Because start from on guardería until university need this specific Medical Entomology for Students to read.

Frank Cockerham:

Nowadays reading books become more than want or need but also work as a life style. This reading addiction give you lot of advantages. The huge benefits you got of course the knowledge even the

information inside the book this improve your knowledge and information. The knowledge you get based on what kind of publication you read, if you want drive more knowledge just go with education books but if you want experience happy read one having theme for entertaining like comic or novel. Typically the Medical Entomology for Students is kind of e-book which is giving the reader capricious experience.

Connie Pauls:

In this era which is the greater man or woman or who has ability in doing something more are more precious than other. Do you want to become considered one of it?
