Pediatric Neurocritical Care From Demos Medical

"Pediatric Neurocritical Care is by far the most comprehensive book I have read dealing with this topic... This text will provide an excellent reference for those interested in the pediatric intensive care cases or pediatrics in general. It is written very well and is chock-full of information that Practitioners in a pediatric ICU setting would use." --**Donna Jacobs, R. EEG T., CNIM, The Neurodiagnostic Journal**

Caring for children with neurocritical illness often requires multi-specialty collaboration and the understanding of an ever-expanding body of data. This book gives clinicians the up-to-date, concise, and clinically relevant guidance they need to provide optimal care to children with these acute neurologic disorders. The chapters in *Pediatric Neurocritical Care* are authored by experts in each individual topic, and co-edited by a neurologist and intensivist to ensure that all topics have been fully addressed from both perspectives.

The book covers the complete continuum of care from assessment, monitoring, and condition specific management through rehabilitation. Early chapters present differential diagnosis and management approaches to common overarching problems such as coma, headache, and elevated intracranial pressure, followed by chapters focusing on the evaluation and management of specific conditions including traumatic brain injury, stroke, seizures, central nervous system infections, and demyelinating disorders. The final chapters address important associated psychological, social, and ethical issues.

To reflect the full spectrum of specialties involved in the burgeoning field of pediatric neurocritical care, the book brings together an international group of experts from multiple disciplines including critical care medicine, anesthesiology, neurology, neurosurgery, rehabilitation medicine, psychology, and pediatric subspecialties.

***Pediatric Neurocritical Care* features:**

- Every topic is addressed from a neurologic and critical care perspective.
- Comprehensive coverage includes the evaluation of common overarching problems and management of specific conditions, in addition to discussion of related psychological, ethical, and social issues.

- Chapters are written by internationally known experts from the fields of critical care medicine, anesthesiology, neurology, neurosurgery, rehabilitation medicine, and many affiliated specialties.

Users Review

From reader reviews:

Carol Berry:

As people who live in the modest era should be revise about what going on or data even knowledge to make these individuals keep up with the era and that is always change and move forward. Some of you maybe can update themselves by reading through books. It is a good choice for you but the problems coming to you is you don't know what type you should start with. This Pediatric Neurocritical Care is our recommendation so you keep up with the world. Why, since this book serves what you want and need in this era.

Aurelio Ashley:

That publication can make you to feel relax. This specific book Pediatric Neurocritical Care was multi-colored and of course has pictures on there. As we know that book Pediatric Neurocritical Care has many kinds or genre. Start from kids until young adults. For example Naruto or Private investigator Conan you can read and feel that you are the character on there. Therefore not at all of book are make you bored, any it offers up you feel happy, fun and loosen up. Try to choose the best book for you personally and try to like reading in which.

Nancy Steffen:

Book is one of source of knowledge. We can add our information from it. Not only for students but additionally native or citizen require book to know the revise information of year to help year. As we know those ebooks have many advantages. Beside most of us add our knowledge, can also bring us to around the world. Through the book Pediatric Neurocritical Care we can consider more advantage. Don't someone to be creative people? To be creative person must choose to read a book. Simply choose the best book that suited with your aim. Don't possibly be doubt to change your life at this book Pediatric Neurocritical Care. You can more appealing than now.

Brenda Luna:

A lot of people said that they feel weary when they reading a book. They are directly felt this when they get a half parts of the book. You can choose the particular book Pediatric Neurocritical Care to make your personal reading is interesting. Your skill of reading proficiency is developing when you just like reading. Try to choose simple book to make you enjoy to see it and mingle the opinion about book and examining especially. It is to be initially opinion for you to like to wide open a book and learn it. Beside that the e-book Pediatric Neurocritical Care can to be a newly purchased friend when you're sense alone and confuse with what must you're doing of their time.
