100 Grey Cases in Paediatrics for MRCPCH By Nagi Barakat

Designed to reflect the latest MRCPCH examination questions, **100 Grey Cases in Paediatrics for MRCPCH** provides a unique and varied selection of clinical cases and their associated explanations. The 100 cases cover all the subspecialties of paediatrics with particular emphasis on paediatric neurology. Each case is clearly and comprehensively explained, many being illustrated with neuro-imaging, X-rays, EEGs and photographs. The discussion section for each case directs the reader to other information sources including textbooks, journals, websites, and courses where relevant.

Practical and easy to use, this book is an essential tool for all candidates studying for the Membership of the Royal College of Paediatrics and Child Health (MRCPCH) Part II examinations in the UK and Ireland and also a useful resource for paediatricians training and working in hospitals. The reader is given guidance on answering examination questions but the information contained within the book should also enhance their knowledge of paediatric medicine.

Editorial Review

Review

This text provides the revising trainee with realistic and fair clinical conundrums that have much wider applications than in an examination hall. Like any good revision text this collection of cases allows you to forget that you are actually revising and by the end of the book you develop a knack for identifying pertinent information and ignoring the red herrings. I am sure that this will soon appear on many trainees' bookshelves.
