Editorial Review

Review

Between the lines of each *Choose* adventure lies some complex science. The choice-and-effect format reflects the treelike structure in game theory to chart possible outcomes based on initial circumstances. Every book contains different but simultaneous outcomes- something that quantum physics posits is the case in the real world, too. --Wired Magazine

From the Publisher

You were born on a spaceship traveling between galaxies. Today is your birthday, and it is time for you to declare citizenship. You must choose which galaxy and planet you wish to belong to. Ahead of you is the planet Phonon, where your father was born. Beyond that is Zernacroyd, your mother's home planet. Both hold great promise for your future. Which will you choose?

If you choose Phonon as your home planet, turn to page 2. If you choose Zernacroyd, turn to page 3. But be careful! There are many dangers waiting for you in distant space. You might be promoted to commander of your own spacecraft. Or you might be pulled into a black hole and disappear forever!

What happens next in the story? It all depends on the choices you make. How does the story end? Only you can find out! And the best part is that you can keep reading and rereading until you've had not one but many incredibly daring experiences!
