Editorial Review

From Library Journal

Asimov has now published at least 460 books and his list continues to grow. In this one, he tells us what scientists know today about the nature of the universe. He does so through 111 short (two- or three-page) chapters, each headed by a simple question: "What is sunlight?"; "What are stars?"; "How old is the universe?"; etc. The answers include historical background and current theory, presented in simple, easy-to-read terms. Although most of this is familiar ground to regular readers of scientific books and magazines, it is a fine introduction to modern astronomical theory for the intellectually curious high school student or intelligent but scientifically illiterate adult.

From the Inside Flap

A wide-ranging exploration of our universe -- from "what makes the wind blow?" to "how was the moon formed?" -- in questions-and-answer format, written in vintage Asimov style. "A fine introduction to modern astronomical theory." -- **LIBRARY JOURNAL**

About the Author

Isaac Asimov began his Foundation series at the age of twenty-one, not realizing that it would one day be considered a cornerstone of science fiction. During his legendary career, Asimov penned more than 470 books on subjects ranging from science to Shakespeare to history, though he was most loved for his award-winning science fiction sagas, which include the Robot, Empire, and Foundation series. Named a Grand Master of Science Fiction by the Science Fiction Writers of America, Asimov entertained and educated readers of all ages for close to five decades. He died, at the age of seventy-two, in April 1992.

Users Review

From reader reviews:
