### Shock By Robin Cook

Two graduate students decide to solve their financial problems by becoming egg donors at an exclusive, highly profitable fertility clinic on Boston's North Shore. But second thoughts and curiosity prompt the two women to find out more about their donated eggs. Obtaining employment at the clinic under aliases, they soon discover the horrifying aims of its research, immediately putting their lives—and their sanity—irrevocably at risk...

Posited on up-to-the-minute science, **Shock** is a spine-tingling novel of medicine run amok by the bestselling master of medical suspense.

### Editorial Review

#### Amazon.com Review

Robin Cook, master of bestselling medical thrillers, answers the "What's the worst thing that could happen?" question in this plot-twisting novel in which villains with no sense of ethics or social responsibility get their greedy hands on the newest cloning technology. It starts when a couple of Harvard graduate students answer the Wingate Clinic's ad for egg donors. The women figure on financing a year in Venice and the down payment on a Boston condo with the extraordinary sum they're promised. But a year later, the heroines feel the emotional need to seek out the children they've made possible for infertile couples. So they disguise themselves and seek jobs at the clinic in order to access the identifying information. The clinic, as it turns out, has plenty of secrets to protect, so it's hard to believe that a pair of computer neophytes could bypass its security. But they do, and the author is an adept enough writer to finesse this detail.

As in past books, Cook is much better at the technical details of medical research than he is at characterization, but he definitely knows how to plot a thriller. This one keeps you turning the pages until the final denouement, though the last chapter ends abruptly, leaving the reader to wonder whether he ran out of steam or is just setting up a sequel in which he'll recycle the villains in a new scheme with a new pair of victims. --*Jane Adams*

#### From Publishers Weekly

The medical thriller has come a long way since Cook and Michael Crichton invented it: recent practitioners like Tess Gerritson have polished it into a powerful dramatic and social engine. Alas, Cook appears to have gotten off at the wrong station or missed the train entirely, judging by his latest effort, a crudely conceived, ineptly written and most damning of all totally unexciting story ripped from old headlines. Things have been going to hell at the Wingate Fertility Clinic, housed in a rambling Victorian mansion near Boston, ever since the gifted Dr. Spencer Wingate decided to take some time off to write a novel and chase women. Not only was he unsuccessful at both activities, but the nasty little replacement he left in charge has been doing some weird stuff including paying young Harvard women \$45,000 for their eggs and driving down the profits. Spencer returns at the same time as two of these women, Deborah Cochrane and Joanna Meissner, who have been spending their payment on Boston real estate and a year in Venice. Judging by the burly security guards on hand who conveniently dispose of a donor who dies on the operating table (and her friend, too) in the first chapter, Deborah and Joanna aren't about to be greeted with open arms. They manage to join the clinic staff under assumed names, hoping to find out what became of the eggs they contributed. Add a farm straight from The Island of Dr. Moreau, where the Wingate staff experiment on animals when they're not busy applying unethical electric shock treatments to human zygotes, and the result is a medical and literary mess with no redeeming features. Advertising on the Today show and CNN; author tour.

#### From Library Journal

Ah, the wonders of modern medicine, which have given us, among other things, the medical thriller. Here, two graduate science students decide to earn a little extra money by donating their eggs to a fertility clinic. But then they discover that something is amiss. A Literary GuildR, Mystery GuildR, and Doubleday Book Club main selection.
