The Goddess of Fortune By Andrew Blencowe

## What if, by the passing of just two events, Japan and Germany had won World War 2?

*The Goddess of Fortune* is a work of speculative fiction in which alternate history is explored, and consequences examined.

- Beautiful Louise, while only 24 years old, uses her intelligence, wiles, and body to dominate the so-called "stronger sex."
- Kaito Sasaki of the Bank of Tokyo, inspired by Lenin ("The best way to destroy the capitalist system is to debauch the currency"), proves just that with his printing of U.S. 100 dollar bills.
- The treachery of Hermann "Fatso" Goering is uncovered and his punishment is swift.
- The duplicity of Roosevelt and his so-called *Brains Trust* is exposed and the doubts of the urbane gentleman, Henry Morgenthau, are made clear.

As a work of historical fiction, *Goddess* reveals the private foibles, quirks, and lusts of the famous (and often rich) of the period. How could the end goals of the Axis come to fruition given these events?

*Goddess* explores just how, and in doing so brings to light in imaginative prose the lives of historical figures we have only known from our history books. Prepare to reimagine history, get *The Goddess of Fortune* today.

## Editorial Review

### Review

"This alternate history of WWII is also a reflection on modern-day economic and social missteps. When folks are clothed, Blencowe shows solid ability to write conversational interactions in a believable fashion, especially in the halls of power." --**Foreword Clarion**

"...Blencowe succeeds in putting a unique spin on familiar events and creating plenty of new ones. He explores the darker connections among governments, corporations, and the military in an informed manner ("Nations have no permanent friends or allies, they only have permanent interests," one character says) and connects subplots in wildly different locales with relative ease." --**Kirkus Reviews**

"*Goddess of Fortune* is a tour-de-force of alternate historical fiction. The scenes jump from one end of the world to the next, but the action is almost constant. The book is filled with a tension, many times sexual, that teases the reader and leaves them yearning for more." --**San Francisco Book Review**

"Taking historical figures, places, and using his magical pen, Blencowe has created an interesting alternate universe of World War II. Every page will intrigue readers further into his brilliantly well-written world of fiction." --**Manhattan Book Review**

### About the Author

Originally from Melbourne, Australia, Andrew Blencowe discovered at an early age what it was like to live on the edge of life. During his high school years he dropped out to become a motorcycle racer. Smitten by computers in his early twenties, he went on to become founder and CEO of an international software company with offices on five continents. It is his international perspective and a drive to challenge assumptions that influence his writing interests. As a weekend student of history, one point he noticed over and over was how a seemingly trivial action had such immense consequences. Regarding this point of minute actions, it is akin to a 1,000-ton boulder balanced precariously on a steel knife edge; at present still, but with the smallest nudge, an army of men cannot stop the monolith from rolling down the hill. Another reoccurring point was how people's time frames are always myopically short; Zhou Enlai, when asked in the early 1970s about the significance of the French Revolution, was reputed to have answered, "Too early to say". This myopia is daily becoming worse and worse as the destruction of the intellect by mobile "telephones" accelerates. Combined with iPads and other electronic reading devices, the ability of the human mind to think and ponder disturbance-free is being destroyed one interruption at a time. These are some of the main threads in Blencowe's novels - the arrogance and massive overconfidence in the new (blithely and wrongly considered better); the panoply of quick fixes rather than a thoughtful analysis of the unexpected consequences of these often dangerous modern expedients.
