**Basic Montessori: Learning Activities For Under-Fives** By David Gettman

For the first time, *Basic Montessori* opens the celebrated philosophy and method to a more general public. David Gettman has devised a clear and modern explanation of Montessori's revolutionary ideas about early intellectual development, and provides a step-by-step guide to the Montessori learning activities most commonly used with under-fives. These include activities for introducing reading and writing, counting and decimal concepts, science, and geography, as well as activities that help develop the child's practical and sensorial skills.

### Editorial Review

#### From Library Journal

Maria Montessori (1870-1952) was a brilliant and original educator. Her work with children stressed the importance of autonomy as an educational goal. Renewed interest in her philosophy and teaching methods and the clear format of this book make it a good choice for public libraries. There is detailed information on her philosophy and an in-depth explanation of her teaching methods. Coverage of practical, sensorial, cultural, mathematic, and language activities includes a statement of the activity's purpose, materials needed (and suggestions on how to make them at home), and exercises. A good reference tool for everyone wanting to know more about or intending to try the Montessori method whether they are parents, teachers, or day-care personnel. Annette V. Janes, Hamilton P.L., Mass.
