Discovering Modern C++: An Intensive Course for Scientists, Engineers, and Programmers (C++ In-Depth) By Peter Gottschling

As scientific and engineering projects grow larger and more complex, it is increasingly likely that those projects will be written in C++. With embedded hardware growing more powerful, much of its software is moving to C++, too. Mastering C++ gives you strong skills for programming at nearly every level, from “close to the hardware” to the highest-level abstractions. In short, C++ is a language that scientific and technical practitioners need to know.

Peter Gottschling’s *Discovering Modern C++* is an intensive introduction that guides you smoothly to sophisticated approaches based on advanced features. Gottschling introduces key concepts using examples from many technical problem domains, drawing on his extensive experience training professionals and teaching C++ to students of physics, math, and engineering.

This book is designed to help you get started rapidly and then master increasingly robust features, from lambdas to expression templates. You’ll also learn how to take advantage of the powerful libraries available to C++ programmers: both the Standard Template Library (STL) and scientific libraries for arithmetic, linear algebra, differential equations, and graphs.

Throughout, Gottschling demonstrates how to write clear and expressive software using object orientation, generics, metaprogramming, and procedural techniques. By the time you’re finished, you’ll have mastered all the abstractions you need to write C++ programs with exceptional quality and performance.

Editorial Review

About the Author

Peter Gottschling is founder of SimuNova, a company that works on developing the Matrix Template Library (MTL4) and offers C++ training. He is a member of the ISO C++ standards committee, vice-chair of Germany's programming language standards committee, and founder of the C++ User Group in Dresden. He earned his Ph.D. in computer science at Technische Universität Dresden in 2002.

Users Review

From reader reviews:

Angel Gardner:

People live in this new time of lifestyle always aim to and must have the time or they will get wide range of stress from both way of life and work. So , when we ask do people have time, we will say absolutely yes. People is human not really a huge robot. Then we inquire again, what kind of activity do you possess when the spare time coming to anyone of course your answer may unlimited right. Then ever try this one, reading ebooks. It can be your alternative with spending your spare time, often the book you have read will be Discovering Modern C++: An Intensive Course for Scientists, Engineers, and Programmers (C++ In-Depth).

Tammy Lugo:

Do you one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Attempt to pick one book that you just dont know the inside because don't ascertain book by its include may doesn't work at this point is difficult job because you are afraid that the inside maybe not seeing that fantastic as in the outside appear likes. Maybe you answer might be Discovering Modern C++: An Intensive Course for Scientists, Engineers, and Programmers (C++ In-Depth) why because the wonderful cover that make you consider about the content will not disappoint you. The inside or content is fantastic as the outside or even cover. Your reading 6th sense will directly make suggestions to pick up this book.

Ralph Ainsworth:

Book is one of source of understanding. We can add our know-how from it. Not only for students but native or citizen will need book to know the revise information of year to year. As we know those textbooks have many advantages. Beside most of us add our knowledge, also can bring us to around the world. By the book Discovering Modern C++: An Intensive Course for Scientists, Engineers, and Programmers (C++ In-Depth) we can have more advantage. Don't you to definitely be creative people? To get creative person must choose to read a book. Just simply choose the best book that suitable with your aim. Don't be doubt to change your life with that book Discovering Modern C++: An Intensive Course for Scientists, Engineers, and Programmers (C++ In-Depth). You can more inviting than now.

Brandon Giles:

Reading a e-book make you to get more knowledge from the jawhorse. You can take knowledge and information from your book. Book is written or printed or outlined from each source that filled update of news. With this modern era like currently, many ways to get information are available for an individual. From media social similar to newspaper, magazines, science book, encyclopedia, reference book, story and comic. You can add your understanding by that book. Ready to spend your spare time to open your book? Or just looking for the Discovering Modern C++: An Intensive Course for Scientists, Engineers, and Programmers (C++ In-Depth) when you necessary it?
