Handbook of Derivatization Reactions for HPLC By George Lunn, Louise C. Hellwig

Thousands of derivatization procedures for HPLC and CE—an essential tool for today's analytical chemist.

This valuable reference offers fast and convenient access to derivatization reactions for both HPLC and capillary electrophoresis (CE). Covering a wide variety of compounds from pharmaceutical drugs and biological products to industrial contaminants, it is organized first by functional group and then by individual reagents. Techniques for each functional group are described in sufficient detail that the researcher can replicate procedures without reference to the original publications—saving hours of tedious library research. And because detailed procedures for the same reagent are listed together, it is easy to combine features of different methods and tailor them to fit specific individual requirements.

Also available on CD-ROM, *Handbook of Derivatization Reactions for HPLC* contains fully abstracted and evaluated procedures from more than 1,900 papers, with descriptions of hundreds of reagents. A further 3,000 papers are referenced in bibliographies that are clearly annotated to help analysts identify those sources likely to be most useful.

This important new resource will be welcomed by chemists working in pharmaceutical, biomedical, and environmental analysis.

Also available on CD-ROM

System requirements . . .

IBM-compatible PC 486 or better and Windows(r) 3.0 or higher, or Macintosh 68030 processor and System 7 or higher

* CD-ROM drive and 8 MB RAM minimum

* 5 MB free hard disk space minimum, 30 MB recommended for full installation.

About the Author

GEORGE LUNN, PhD, a consultant and scientific writer, currently works for the Food and Drug Administration and is a former senior research scientist for Program Resources, Inc. at the NCI-Frederick Cancer Research and Development Center in Frederick, Maryland. He is the coauthor of *Destruction of Hazardous Chemicals in the Laboratory* and *HPLC Methods for Pharmaceutical Analysis*, both published by Wiley.

LOUISE C. HELLWIG, PhD, is a lecturer in the Chemistry Department of Morgan State University in Baltimore, Maryland. She holds degrees in chemistry and computer science from Swarthmore College, the University of Wisconsin, Madison, and Towson University.

Users Review

From reader reviews:

David Stephenson:

The reason why? Because this Handbook of Derivatization Reactions for HPLC is an unordinary book that the inside of the reserve waiting for you to snap the item but latter it will surprise you with the secret this inside. Reading this book adjacent to it was fantastic author who also write the book in such wonderful way makes the content inside of easier to understand, entertaining method but still convey the meaning completely. So , it is good for you because of not hesitating having this any more or you going to regret it. This unique book will give you a lot of gains than the other book have got such as help improving your skill and your critical thinking way. So , still want to hold up having that book? If I had been you I will go to the book store hurriedly.

Chris Wolf:

Handbook of Derivatization Reactions for HPLC can be one of your beginning books that are good idea. All of us recommend that straight away because this e-book has good vocabulary that may increase your knowledge in terminology, easy to understand, bit entertaining but nevertheless delivering the information. The article writer giving his/her effort to put every word into satisfaction arrangement in writing Handbook of Derivatization Reactions for HPLC although doesn't forget the main stage, giving the reader the hottest along with based confirm resource information that maybe you can be considered one of it. This great information could drawn you into new stage of crucial considering.

Gary Wells:

That e-book can make you to feel relax. This book Handbook of Derivatization Reactions for HPLC was bright colored and of course has pictures around. As we know that book Handbook of Derivatization Reactions for HPLC has many kinds or type. Start from kids until young adults. For example Naruto or Private eye Conan you can read and think you are the character on there. Therefore , not at all of book tend to be make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book for you personally and try to like reading which.

Joshua White:

What is your hobby? Have you heard which question when you got college students? We believe that that question was given by teacher for their students. Many kinds of hobby, All people has different hobby. Therefore you know that little person including reading or as reading become their hobby. You need to know that reading is very important as well as book as to be the factor. Book is important thing to incorporate you knowledge, except your own personal teacher or lecturer. You will find good news or update regarding something by book. A substantial number of sorts of books that can you take to be your object. One of them is niagra Handbook of Derivatization Reactions for HPLC.
