Oxford Textbook of Cardiothoracic Anaesthesia (Oxford Textbook in Anaesthesia) By Marco Ranucci

The new *Oxford Textbook of Cardiothoracic Anaesthesia* provides a comprehensive overview of and a thorough grounding in this challenging subspecialty. Both cardiac and thoracic anaesthesia demand high levels of knowledge and skill, as minimally invasive surgical techniques demand a sounder understanding of the specialties and as more patients with co-morbidities present for surgery

Part of the Oxford Textbooks in Anaesthesia series, this resource covers the anatomy and physiology, pharmacology, post-operative complications, critical care, and all clinical aspects of cardiac and thoracic anaesthesia. Practical aspects, such as team working, and designing and equipping cardiothoracic theatre and critical care, are also included. The expert and international author team use their experience to ensure this comprehensive online resource reflects current world-wide practice across the globe.

This resource is published with a concurrent online version, which features access to the full content of the textbook, contains links from the references to primary research journal articles, allows full text searches, and provides access to figures and tables that can be downloaded to PowerPoint ®.

Designed for consultants and trainees in cardiac and thoracic anaesthesia, this is the definitive source of expert knowledge for anaesthetists in this subspecialty.
