Essentials of Domestic Animal Embryology E-Book By Poul Hyttel, Fred Sinowitz, Morten Vejlsted, Keith Betteridge

This reference on veterinary embryology covers general embryology, i.e. the development from the formation of the gametes over fertilization and initial embryogenesis up to the stage where organ formation is initiated, and special embryology, i.e. the development of the organ systems. Moreover, the book also includes a section on teratology, one on assisted reproductive technologies and one on veterinary and societal aspects. Written with the veterinary student in mind, this textbook is written in an accessible style with high quality colour illustrations and line drawings.

- Succinct and accessible
- 300 high-quality colour illustrations
- Written for undergraduates and invaluable for graduates wishing to brush up

Editorial Review

Review

"However, this work remains an excellent reference & study handbook for which many embryologists and veterinary students have waited so long since the book by Noden and de Lahunta went out of press. More than the work of McGeady et al., the Essentials of Domestic Animal Embryology by Hyttel et al. is a worthy successor of the latter. It is contemporary in all fields: its approach of the subject, its style and volume, the language, the huge amount of illustrations... and I'm sure it will serve as a reference handbook for many years." **Pieter Cornillie Lecturer in Veterinary Embryology at Ghent University May 2010**

Users Review

From reader reviews:

Ralph Garibay:

Have you spare time for a day? What do you do when you have more or little spare time? Yeah, you can choose the suitable activity to get spend your time.
