Editorial Review

Review

"...completely revised to reflect current progress in pharmacy practice the fourth edition of "Pharmaceutical Practice" will be valued by pharmacy teachers, students in addition to practitioners...covers the total pharmacy spectrum. It is a core text for pharmacy practice and dispensing modules of the pharmacy curriculum and will be a companion during the whole pharmacy career starting at the university. I can recommend this textbook to any person either teaching or studying or practicing pharmacy." **International Society of Pharmaceutical Compounding, February 2010**

Reviews of Previous Edition

"...this book is a useful introduction to the various elements of pharmacy practice and will be valued by pharmacy students and student technicians in addition to practising pharmacists. As a researcher, teacher and practitioner of pharmacy, I am pleased to keep a copy on my own bookshelves." **The Pharmaceutical Journal, August 2004** "...use this textbook when teaching students how to dispense, and label medicines correctly. It thus forms a very important function and role in my teaching programme. The textbook's content is well illustrated and presents with detailed, useful information that is reader friendly and easy to understand. The summary at the beginning of each chapter also gives a good oversight of each chapter's content. The examples are very useful. I would like to see every pharmacy student invest in a book like this." **Senior Pharmacy Lecturer, Medical University of South Africa** "...great amount of thought and time has gone into the layout of the textbook with each major area having its own part in the textbook; this function allows the finding of information quick and quite painless. Nicely illustrated diagrams are also well featured throughout the textbook as are worked examples for the variously extensive array of calculations featured...extremely valuable in many areas of the course and I can recommend without bias that any person studying pharmacy should own this textbook as you will also find it indispensable throughout your careers." **First Year Pharmacy Student, University of East Anglia, March 2004**
