### **Sustainable Future for Melanesia: Natural Resources, Population and Development (Pacific policy papers)** By Bob Thislethwaite, Derrin Davis

The countries of Melanesia have reached a crossroads in their development. Melanesia is resource rich, but the long-term economic viability of the region depends on the governments of those countries recognizing the immediate necessity of planning their natural resource use, with a view to sustainable development. The Pacific 2010 series has been influential in forcing Melanesian policymakers to confront the big questions about the future of their islands. This book presents a comprehensive view of the challenges faced in establishing economy-wide policy guidelines for sustainable resource use and present recommendations for action. --- from book's back cover
