Tactical Communications for the Digitized Battlefield

By Michael Ryan

Tactical Communications for the Digitized Battlefield By Michael Ryan

Traditional tactical communications systems consist of a number of separate subsystems with little interworking between them and with external sensors and weapons systems. Combat net radio (Cnr) has provided the high-mobility communications required by combat troops, while trunk communications systems have provided high-capacity communications between headquarters at the expense of mobility. The focus of this book is on new, information-age technologies that promise to offer seamless integration of real-time data sharing, creating a single logical network architecture to facilitate the movement of data throughout the battlespace. Because the structure of this network is constrained by the fundamental trade-off between range, mobility and capacity that applies to all communications systems, this network is unlikely to be based on a single network technology. This book presents an architecture for this network, and shows how its subsystems can be integrated to form a single logical network. You are provided with an indispensable framework of guidelines and standards within which to consider the development, upgrade, and procurement of battlefield communications systems to migrate to this new target architecture. You are given a complete analysis of potential solutions such as commercial networks, satellite and cellular solutions, Iridium, as well as military solutions such as Ptarmigan, Mse, Autoko, Sotrin, Bowman, Sincgars, Eplrs, Jtids, and future systems Ntdr and Jtrs. Unique to this book is an outline of the steps to take to upgrade from current systems.

Editorial Review

About the Author
Michael Frater is an associate professor at the University of New South Wales in Australia and is the coauthor of Electronic Warfare for the Digitized Battlefield (Artech House, 2001). He holds a Bachelor of Engineering (Electrical) from the University of Sydney, a Masters of Higher Education from the University of New South Wales and a Ph.D. in systems engineering from the Australian National University.

Michael Ryan is a senior lecturer at the University of New South Wales in Australia, where he received his Masters of Engineering Science and his Ph.D. in electrical engineering. He is the coauthor of Electronic Warfare for the Digitized Battlefield (Artech House, 2001).

Users Review

From reader reviews:

Mildred Wright:

As people who live in often the modest era should be up-date about what going on or info even knowledge to make them keep up with the era and that is always change and advance. Some of you maybe will probably update themselves by examining books. It is a good choice in your case but the problems coming to you is you don't know what one you should start with. This Tactical Communications for the Digitized Battlefield is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and want in this era.

Roger Lindsey:

Your reading 6th sense will not betray you, why because this Tactical Communications for the Digitized Battlefield guide written by well-known writer whose to say well how to make book which can be understand by anyone who have read the book. Written within good manner for you, leaking every ideas and creating skill only for eliminate your own personal hunger then you still question Tactical Communications for the Digitized Battlefield as good book not merely by the cover but also through the content. This is one publication that can break don't determine book by its cover, so do you still needing another sixth sense to pick this particular!? Oh come on your examining sixth sense already said so why you have to listening to another sixth sense.

Brenda Burrows:

Beside this particular Tactical Communications for the Digitized Battlefield in your phone, it may give you a way to get nearer to the new knowledge or details. The information and the knowledge you are going to got here is fresh from oven so don't end up being worry if you feel like an previous people live in narrow commune. It is good thing to have Tactical Communications for the Digitized Battlefield because this book offers to you readable information. Do you at times have book but you would not get what it's about. Oh

come on, that will not end up to happen if you have this within your hand. The Enjoyable arrangement here cannot be questionable, like treasuring beautiful island. So do you still want to miss the idea? Find this book as well as read it from right now!

Ella Hodge:

Many people said that they feel bored stiff when they reading a guide. They are directly felt that when they get a half elements of the book. You can choose often the book Tactical Communications for the Digitized Battlefield to make your current reading is interesting. Your own skill of reading proficiency is developing when you similar to reading. Try to choose very simple book to make you enjoy you just read it and mingle the sensation about book and reading especially. It is to be initially opinion for you to like to open a book and go through it. Beside that the guide Tactical Communications for the Digitized Battlefield can to be your new friend when you're sense alone and confuse with what must you're doing of that time.
