## Editorial Review

From Publishers Weekly

Starred Review. Moon's world is populated by many different intelligent species (none of them human), and he has never known which one he belongs to. Orphaned at a young age, he's wandered from tribe to tribe, hiding a dangerous secret. Like the universally hated Fell, whose only aims are slaughter and conquest, Moon can fly—which leads to predictably violent cases of mistaken identity. When he does find his own people, the Raksura, life doesn't get any easier, since their internal politics are vicious, and they too are in imminent danger from the Fell. Cue hairsbreadth escapes and feats of derring-do, as Moon helps his new family evacuate their doomed colony and then rescues a group of kidnapped children. Wells (*The Gate of Gods*) merrily ignores genre conventions as she spins an exciting adventure around an alien hero who anyone can identify with. (Mar.)

## Review

But the vivid world-building and nonstop action really serve as a backdrop for the heart--the universal human themes of loneliness, loss, and the powerful drive to find somewhere to belong. - **Sharon Shinn** --Cover Blurb

There's so much to like here: multiple sapient species sharing a world (or NOT sharing) with complex gender roles, wildly differing societies, and varying technologies. This is rigorous fantasy without the trappings of European medievalism. And most of all, it's riveting storytelling.- **Steven Gould, author of *Jumper***

*The Cloud Roads* has wildly original worldbuilding, diverse and engaging characters, and a thrilling adventure plot. It's that rarest of fantasies: fresh and surprising, with a story that doesn't go where ten thousand others have gone before. I can't wait for my next chance to visit the Three Worlds! - **N.K. Jemisin, author of *The Hundred Thousand Kingdoms***
