### Aviation Weather by Peter Lester By Peter Lester

Aviation Weather is designed to help the student of aviation understand the atmosphere in which he or she operates. It also serves as a valuable reference source for pilots at all levels. Whether your connection to flying is as a new student, a certified pilot, controller, dispatcher, scientist, engineer, or an interested passenger, Aviation weather will help you understand the strong interdependence of aviation and meteorology through over 300 full color illustrations, a minimum of mathematics, and a maximum of practical information. 3rd edition updates and changes: \* Much of the content was updated to reflect new developments in weather science and technology, as well as new graphic weather presentations and delivery methods. \* New material has been added on subjects like space weather, lightning/atmospheric electricity, and cold climate hazards. \* Rearranged content to facilitate teaching it with related material. (weather radar and contrails, for example) \* Some content was revised to emphasize aviation applications. \* Study questions were updated. \* Approximately 100 charts, photos, and graphics were replaced, updated, or otherwise improved. \* Chapter 17 was completely rewritten, with much new information on evaluating weather information and flight planning. \* Appendixes and index were updated
