Essays on Developmental Biology Part A, Volume 116 (Current Topics in Developmental Biology) From Wassarman Paul M

In 2016 *Current Topics in Developmental Biology* (CTDB) will celebrate its 50th or “golden” anniversary. To commemorate the founding of CTDB by Aron Moscona (1921-2009) and Alberto Monroy (1913-1986) in 1966, a two-volume set of CTDB (volumes 116 and 117), entitled *Essays on Development*, will be published by Academic Press/Elsevier in early 2016. The volumes are edited by Paul M. Wassarman, series editor of CTDB, and include contributions from dozens of outstanding developmental biologists from around the world. Overall, the essays provide critical reviews and discussion of developmental processes for a variety of model organisms. Many essays relate the history of a particular area of research, others personal experiences in research, and some are quite philosophical. *Essays on Development* provides a window onto the rich landscape of contemporary research in developmental biology and should be useful to both students and investigators for years to come.

- Covers the area of developmental processes for a variety of model organisms
- International board of authors
- Part of two 50th Anniversary volumes providing a comprehensive set of reviews edited by Serial Editor Paul M. Wassarman

Editorial Review

Review

Praise for the Series: "Outstanding both in variety and in the quality of its contributions." --**Nature**

About the Author

Paul M. Wassarman, the Series Editor of CTDB since 2007, is Professor in the Dept. Developmental and Regenerative Biology at the Icahn School of Medicine at Mount Sinai in New York City. He received a Ph.D. in biochemistry from Brandeis University where he carried out thesis research in the Graduate Dept. Biochemistry with Professor Nathan O. Kaplan. In 1967 Wassarman joined the Division of Structural Studies at the MRC, Laboratory of Molecular Biology in Cambridge, England as a Helen Hay Whitney Foundation Fellow with Sir John C. Kendrew. In 1972 he joined the faculty of the Dept. Biological Chemistry at Harvard Medical School and in 1986 moved to the Roche Institute of Molecular Biology where he was Chair of the Dept. Cell and Developmental Biology and Adjunct Professor in the Dept. Cell Biology, New York University School of Medicine. In 1996 he moved to the Icahn School of Medicine at Mount Sinai where he was the Lillian and Henry M. Stratton Professorial Chair of the Dept. Molecular, Cell, and Developmental Biology. Wassarman has published more than 200 research papers and reviews, dealing primarily with mammalian oogenesis, fertilization, and early embryogenesis.

Users Review

From reader reviews:

Stephan Partin:

The actual book Essays on Developmental Biology Part A, Volume 116 (Current Topics in Developmental Biology) has a lot info on it. So when you read this book you can get a lot of advantage. The book was authored by the very famous author. This articles author makes some research ahead of write this book. This kind of book very easy to read you can obtain the point easily after reading this article book.

Logan Merritt:
