Editorial Review

From the Publisher

The first full-color book on the market and the only text thoroughly cover both geologic hazards and environmental problems. Extremely current and up-to-date coverage of volcanoes, earthquakes, flooding, landslides along with separate chapters on pollution, surface water, ground water, landslides, subsidence/collapse, air pollution, and comprehensive four-chapter treatment of coastal zones.

From the Back Cover

The first book to address both natural geologic hazards, human induced geologic hazards and two geologically-related problems caused by humans (e.g. air pollution, acid rain, etc.) in the same book.

Users Review

From reader reviews:

Mike Huey:

Book is to be different for every grade. Book for children until eventually adult are different content. To be sure that book is very important for us. The book Geohazards: Natural and Human ended up being making you to know about other knowledge and of course you can take more information. It is very advantages for you.
