## Qualitative HCI Research: Going Behind the Scenes (Synthesis Lectures on Human-Centered Informatics) By Ann Blandford, Dominic Furniss, Stephann Makri

Human-Computer Interaction (HCI) addresses problems of interaction design: understanding user needs to inform design, delivering novel designs that meet user needs, and evaluating new and existing designs to determine their success in meeting user needs. Qualitative methods have an essential role to play in this enterprise, particularly in understanding user needs and behaviours and evaluating situated use of technology. Qualitative methods allow HCI researchers to ask questions where the answers are more complex and interesting than "true" or "false," and may also be unexpected. In this lecture, we draw on the analogy of making a documentary film to discuss important issues in qualitative HCI research: historically, films were presented as finished products, giving the viewer little insight into the production process; more recently, there has been a trend to go behind the scenes to expose some of the painstaking work that went into creating the final cut. Similarly, in qualitative research, the essential work behind the scenes is rarely discussed. There are many "how to" guides for particular methods, but few texts that start with the purpose of a study and then discuss the important details of how to select a suitable method, how to adapt it to fit the study context, or how to deal with unexpected challenges that arise. We address this gap by presenting a repertoire of qualitative techniques for understanding user needs, practices and experiences with technology for the purpose of informing design. We also discuss practical considerations such as tactics for recruiting participants and ways of getting started when faced with a pile of interview transcripts. Our particular focus is on semi-structured qualitative studies, which occupy a space between ethnography and surveys-typically involving observations, interviews and similar methods for data gathering, and methods of analysis based on systematic coding of data. Just as a documentary team faces challenges that often go unreported when arranging expeditions or interviews and gathering and editing footage within time and budget constraints, so the qualitative research team faces challenges in obtaining ethical clearance, recruiting participants, analysing data, choosing how and what to report, etc. We present illustrative examples drawn from prior experience to bring to life the purpose, planning and practical considerations of doing qualitative studies for

interaction design. We include takeaway checklists for planning, conducting, reporting and evaluating semi-structured qualitative studies.

**Editorial Review**

**Users Review**

**From reader reviews:**

**Ann Davis:**

What do you consider book? It is just for students since they're still students or this for all people in the world, the actual best subject for that? Just simply you can be answered for that concern above. Every person has several personality and hobby for every other. Don't to be pressured someone or something that they don't need do that. You must know how great and also important the book Qualitative HCI Research: Going Behind the Scenes (Synthesis Lectures on Human-Centered Informatics). All type of book can you see on many options. You can look for the internet solutions or other social media.

**Thomas Paris:**

Reading a guide can be one of a lot of action that everyone in the world really likes. Do you like reading book consequently. There are a lot of reasons why people enjoy it. First reading a reserve will give you a lot of new facts. When you read a guide you will get new information since book is one of a number of ways to share the information or their idea. Second, studying a book will make anyone more imaginative. When you examining a book especially fiction book the author will bring one to imagine the story how the characters do it anything. Third, you are able to share your knowledge to others. When you read this Qualitative HCI Research: Going Behind the Scenes (Synthesis Lectures on Human-Centered Informatics), it is possible to tells your family, friends along with soon about yours book. Your knowledge can inspire different ones, make them reading a publication.

**Dwayne Moseley:**

Reading can called thoughts hangout, why? Because if you are reading a book specially book entitled Qualitative HCI Research: Going Behind the Scenes (Synthesis Lectures on Human-Centered Informatics) your head will drift away trough every dimension, wandering in every single aspect that maybe mysterious for but surely will become your mind friends. Imaging every single word written in a e-book then become one contact form conclusion and explanation this maybe you never get before. The Qualitative HCI Research: Going Behind the Scenes (Synthesis Lectures on Human-Centered Informatics) giving you an additional experience more than blown away the mind but also giving you useful facts for your better life within this era. So now let us explain to you the relaxing pattern is your body and mind is going to be pleased when you are finished studying it, like winning an activity. Do you want to try this extraordinary investing spare time activity?

**Vickie Gilbert:**

Don't be worry for anyone who is afraid that this book will certainly filled the space in your house, you might have it in e-book approach, more simple and reachable. That Qualitative HCI Research: Going Behind the Scenes (Synthesis Lectures on Human-Centered Informatics) can give you a lot of buddies because by you taking a look at this one book you have point that they don't and make an individual more like an interesting person. This book can be one of one step for you to get success. This e-book offer you information that probably your friend doesn't learn, by knowing more than various other make you to be great men and women. So , why hesitate? We should have Qualitative HCI Research: Going Behind the Scenes (Synthesis Lectures on Human-Centered Informatics).
