### Editorial Review

From School Library Journal

Gr 1–3—This delightful picture book provides a brief overview of these majestic creatures, from the perspective of a young boy absorbed in a volume about blue whales. (In a fun twist, the boy is revealed to be reading this very book.) Rich, warm, and imaginative, the illustrations support the clear, accessible text effectively, conveying the facts in a charming and accessible way that will easily resonate with kids. For instance, a page that states that blue whales weigh as much as 55 hippopotami is accompanied by an illustration of the boy sitting atop a pile of pachyderms, while a spread devoted to the vast quantities of milk whale calves drink features an image of 50 plastic milk jugs. Desmond includes endearing details as well, such as the boy's childlike pictures of these marine mammals, and her affection and admiration for the species is evident throughout, down to the last page, which depicts the boy asleep on a bedlike raft as a blue whale dives below the surface. VERDICT Budding cetologists will enjoy this lovingly crafted work.—Maggie Chase, Boise State University, ID
